

## ENVIRONMENTAL POLICY STATEMENT

---

### Environmental Policy – March 2017

The ACC Liverpool Group has high targets for environmental management and sustainability reflected in the design of the building. However, design is only part of the story and to continue to be environmentally responsible we enhance this with the environmental policies and practices we put in place for the running of the facility.

We aim to represent 'best practice' in all areas of sustainable service delivery and encourage not only our industry to address environmental challenges but also clients and visitors through example, support and collaboration.

Our environmental policy reflects our commitment to the following:

- Adhere to all applicable legislation, adopted codes of practice and other regulatory controls whilst continually improving on these elements
- Commitment to the prevention of pollution
- Continually improve our 'REDUCE, REUSE, REPAIR and RECYCLE' philosophy whilst encouraging visitors to also adopt elements of this practice
- Aim where feasible to utilise environmentally friendly products within the venue
- Use energy (including renewable energy) and other natural resources efficiently and reduce our consumption where possible
- Encourage the use of environmentally friendly forms of transport by both visitors and staff accessing the venue
- Continually improve our overall environmental performance through setting long term objectives supported by a series of key performance indicators
- To seek continuous environmental improvement via our employees and service partners, through the work of our internal Environmental Task Force
- To communicate this policy to all visitors and all persons working for and on behalf of the venue. It is also made available to the public via The ACC Liverpool Group's Corporate Website
